

OCTOBER 2023

**POINT PARK WIFI
SURVEY RESULTS**

October 2023 - Survey Results

Point Park WIFI

235 student responses.

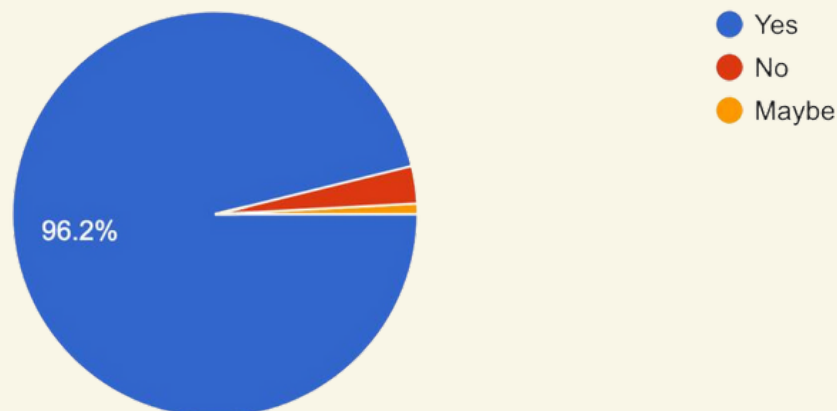

This survey data provides a comprehensive list of all the information gathered from the Point Park WIFI Google form. The dataset has undergone a thorough review by the Student Government Association (SGA) senators and executive cabinet. Each student was permitted to submit only one response to ensure data integrity. The 'x' in the responses indicates the quantity with which students reported the same issues related to Wi-Fi service, particularly areas with non-functional or unreliable connections.

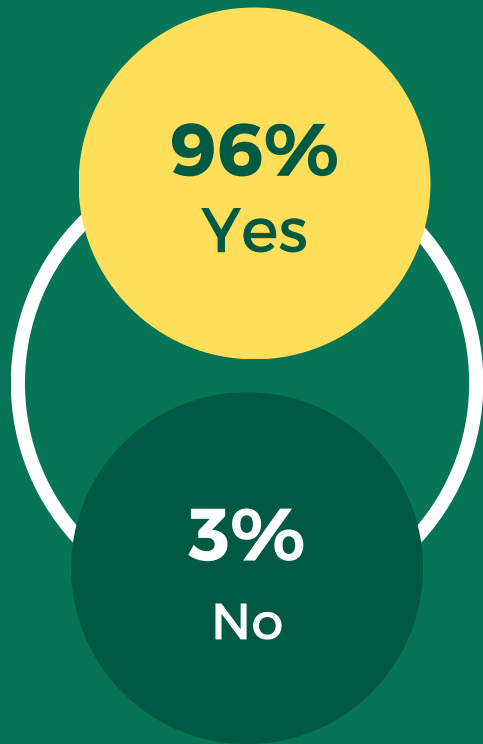

The data with asterisks next to them represent the primary areas of concern among students. It's worth noting that students expressed concerns across nearly all floors of every building, except the Student Center and Conestoga Hall. Upon closer examination of the detailed data, it becomes evident that students face challenges not only in using Wi-Fi but also in establishing and maintaining connections. This data underscores that Boulevard Apartments and Lawrence Hall are the most affected areas, though this data also indicates a much larger widespread problem. This data highlights the pressing need to address the Wi-Fi connectivity challenges faced by students on campus.

Have you experienced any issues with campus WiFi?"
